Refreshments are available prior to
the meeting in the Shell lounge,
Department of Mechanical and Civil
Engineering, from 6:15 onwards.

Monday 6th February 2017

Improving the Standards for Basement Construction for Houses in the UK

Marc Separovic

Synopsis

The talk will provide an overview of the current challenges facing the house building industry and what impact this has had on construction quality in recent times.

The main focus will be on 'below ground level foundation and basement failures' including the common areas of defects, root causes and the potential impact and commercial consequences. This will be explored through a variety of examples covering the full build cycle - design/construction/defect and remedial solution.

About Our Speaker

Marc Separovic is a passionate Chartered Civil Engineer with extensive experience in Innovation, Change Management, Project Management, Civil and Structural Engineering across a variety of disciplines in the Construction Industry including; consultancy, rail, local authority, and residential. Currently in the house building sector as a Senior Technical Projects Manager at NHBC, Marc is focusing his effort on evolving new raising standards initiatives and leading them from concept through to operations.
